

At 15.5F, the T-3 CT catheter is the largest triple lumen power injectable catheter available. Its large lumen size enables greater flow rates, which improve the administration of extracorporeal therapies including dialysis, hemofiltration, apheresis and plasmapheresis. A power injectable central lumen expands the device's capability by enabling infusion, power

injection of contrast media and central venous pressure monitoring. Manufactured from radiopaque thermosensitive material, the T-3 CT provides increased patient comfort, excellent resistance to kinking and improved biocompatibility. The T-3 CT marks another step forward in Medcomp's continued goal of improving clinical access and patient's quality of life.

## Double Lumen Reliability, CT Injectable Triple Lumen Versatility

- 1 Triple Lumen**  
Two dedicated dialysis lumens coupled with a power injectable central lumen provides convenient access for not only dialysis but infusion, power injection of contrast media and withdrawal needs, enabling multiple therapies through one access site.
- 2 Radiopaque Polyurethane**  
The radiopaque polyurethane catheter material provides rigidity for insertion, kink resistance to ensure adequate treatment, and thermosensitivity to provide increased patient comfort.
- 3 Available in 15, 20, 24, 28 & 32cm Insertion Length**  
Ranging sizes from 15 to 32cm, the T-3 CT catheter accommodates various insertion sites and individual patient anatomy to achieve the most adequate treatments possible.
- 4 Step Tip Design**  
With an open Step Tip Design and a 90-degree arterial lumen, the T-3 CT catheter provides optimal flow rates, reduced arterial insufficiency and improves the ability to hold locking solutions, maintaining catheter patency.
- 5 15.5F Lumen**  
The T-3 CT's large lumen size enables greater flow rates, which improve the administration of extracorporeal therapies including dialysis, hemofiltration, apheresis and plasmapheresis.
- 6 Rotatable Suture Wing**  
Rotatable Suture Wing provides increased patient comfort and device securement.
- 7 Isoplast Luers**  
The isoplast luers have an outstanding practical toughness, dimensional stability and chemical resistance to provide you and your patients with a safe and reliable dialysis connection for the duration of treatment.
- 8 Priming Volumes**  
Clearly labeled priming volumes ensure a proper and adequate instillation of locking solution to maintain optimal catheter patency.

## CATHETER ONLY CONTAINS:

- (1) Catheter
- (3) Dilators
- (1) Valved Introducer
- (1) Patient ID Card
- (3) Injection Caps

## BASIC SET CONTAINS:

- (1) Catheter
- (3) Dilators
- (1) Scalpel
- (1) Valved Introducer
- (1) Guidewire
- (1) Adhesive Wound Dressing
- (1) 2-0 Silk Suture
- (1) Patient ID Card
- (3) Injection Caps
- (1) Introducer Needle

## FULL TRAY CONTAINS:

- (1) Catheter
- (1) Introducer Needle
- (1) Guidewire
- (3) Dilators
- (1) Safety Scalpel
- (1) Valved Introducer
- (1) Adhesive Wound Dressing
- (3) Injection Caps
- (4) 4"x4" Gauze
- (2) Chlorhexidine
- (1) 5cc Syringe
- (3) 10cc Pre-Filled Syringes
- (1) 2-0 Silk Suture
- (3) Safety Hypodermic Needles
- (1) Hemostat
- (1) Fenestrated Drape
- (1) 5cc Lidocaine
- (1) Filter Straw
- (1) Surgical Gloves

## MAX BARRIER CONTAINS:

- (1) Catheter
